Accessibility Statement

We are continuously working to improve the accessibility of the content on our website. Below you will find a few recommendations to help make your browsing experience more accessible:

If you have trouble seeing web pages: The US Social Security Administration offers these tips for optimizing your computer and browser to improve your online experience.

- o   Use your computer to read web pages out loud
- o   Use the keyboard to navigate screens
- o   Increase text size
- o   Magnify your screen
- o   Change background and text colors
- o   Make your mouse pointer more visible

Some of these features are available on our site in the top right corner, while others do require changes on the end users computer.

If you are looking for mouse and keyboard alternatives, speech recognition software such as Dragon Naturally Speaking may help you navigate web pages and online services. This software allows the user to move focus around a web page or application screen through voice control.

If you are deaf or hard of hearing: There are several accessibility features available to you.

Closed Captioning

Closed captioning provides a transcript for the audio track of a video presentation that is synchronized with the video and audio tracks. Captions are generally visually displayed over the video, which benefits people who are deaf and hard of hearing and anyone who cannot hear the audio due to noisy environments.

Volume Controls

Your computer, tablet, or mobile device has volume control features. Each video and audio service has its own additional volume controls. Try adjusting both your device's volume controls and your media players' volume controls to optimize your listening experience.

If the recommendations above do not meet your needs, we invite you to contact us at info@dentalescape.com or (719) 531-7111 for assistance.
